NISSAN SUSTAINABILITY 2022

Nissan launched Nissan Sustainability 2022, a plan to reduce the company's environmental impact, strengthen diversity and inclusion, and enhance governance, in line with the company's midterm plan, Nissan M.O.V.E. to 2022. The company is working to achieve a world with zero emissions and zero fatalities by strengthening its environmental, social and governance initiatives.

**Environmental Initiatives**
Nissan is on the fourth generation of its Nissan Green Program, a series of midterm environmental action plans first launched in fiscal 2001, implementing its environmental initiatives to create a zero emission society. With an overarching vision set for 2050, the plan focuses on providing value to society by addressing climate change, resource dependency, air quality and water scarcity towards 2022.

**Social Initiatives**
Nissan has long considered driving safety and corporate philanthropy to be the hallmarks of its social initiatives. As part of its Nissan Intelligent Mobility strategy, Nissan is introducing advanced safety technologies and autonomous driving technologies such as ProPILOT, to advance the ultimate goal of reducing fatalities involving Nissan vehicles to zero. Nissan is also focused on promoting diversity to become a truly inclusive company where its diverse employees can achieve their potential.

**Governance Initiatives**
Nissan is improving its governance through an enhanced compliance system. As part of this effort, the company appointed two new independent directors at the beginning of the current fiscal year. By reinforcing governance, Nissan is contributing to the growth of the company while increasing its stakeholder value.
