SOCIAL POLICIES AND PHILOSOPHY

GRI102-15 GRI103-1 GRI103-2

Nissan's business activities are supported by various stakeholders. As well as respecting the rights of all stakeholders, as a global company we conduct our business activities with a constant awareness of society's needs and social responsibility in order to contribute to the sustainable development of society.

Through an assessment of various business risks and opportunities, we have identified six key areas in the Social dimension as part of Nissan Sustainability 2022, and we are conducting initiatives in these areas. The six areas are Traffic Safety, Diversity and Inclusion, Quality, Supply Chain, Employees, and Community Engagement.

In the area of Traffic Safety, we are promoting development and implementation of driver assistance technology and other traffic safety technologies to achieve our ultimate goal of virtually zero fatalities involving our vehicles. Regarding Diversity and Inclusion, we are proactively hiring more diverse talent with different backgrounds to embrace gender and national diversity as a strength for the organization. We also aim to be a truly inclusive company so that employees can demonstrate their potential to the fullest.

Quality is fundamental to Nissan's activities. Rooting the basis of all of our activities to the practice of listening to each one of our customers, we are making sure that employees are aware at all levels of the organization regarding the importance of quality improvement. We are strengthening our sustainability initiatives in all phases of our Supply Chain, from the procurement of raw materials to manufacturing, distribution, sales, and after-

sales service, covering all the activities involved until the finished product reaches our customers.

With respect to Employees, we are expanding opportunities for our employees to learn so that they can each achieve their maximum potential. We aim to make continuous learning and talent development a part of our corporate culture, and to create a dynamic work environment where the health and safety of our staff is a top priority. Furthermore, as local communities are an essential part of Nissan's business in every region, we are working to promote Community Engagement around the world in three strategic areas: environment, traffic safety, and diversity.

For this Sustainability Report, activities within these six areas were selected to be reported on, based on an assessment of their potential business impact as well as the level of interest from stakeholders.
