Corporate Governance System in Detail

Nissan strives to improve corporate governance as one of its most prioritized managerial tasks, and will continue to develop business activities while maintaining a constant awareness of society's expectations and our social responsibilities in order to contribute to the development of a sustainable society.

In line with the June 2019 transition to a company with three statutory committees, we separated management functions and supervisory, oversight and auditing functions, making executive officers responsible for the execution of business operations, while members of the Board of Directors focus on supervision of their assigned duties. This has improved the transparency of the decision-making process and also made business execution speedier and more flexible. Furthermore, by increasing the number of outside directors to a majority of the board, we are working to reflect a diversity of viewpoints in our management and further strengthen the supervision function. The Board of Directors has established three committees: the Nomination Committee, which decides on candidates for director positions; the Compensation Committee, which sets compensation for directors and executive officers; and the Audit Committee, which audits the business execution of directors, executive officers, and those with similar responsibilities. Outside directors make up more than half of each committee, and play a leading role in the Nomination and Compensation

Committees. This ensures healthy governance, oversight and auditing by the Board of Directors and other corporate bodies heightening the effectiveness of our structures in terms of internal controls, compliance and risk management. Officers and employees, including executive officers, will sincerely respond to this supervision, oversight and auditing.

In addition, we announce clear management targets and policies to all stakeholders and disclose our performance promptly with a high degree of transparency.

We have also established a corporate governance system that maintains business transparency. The system allows us to implement various monitoring systems, as well as assess and manage risks that have the potential of preventing us from achieving our business goals. In addition to carrying out cooperation among sites in the regions in which we operate, we have set up global management systems and provide relevant training programs to our employees and business partners. We aim to disclose governance information with even greater transparency in future.

Strengthening Corporate Governance System

Nissan transitioned to a three statutory-committee format, establishing nomination, compensation and audit committees, and is working to strengthen governance under the following points.

New System Key Points

- (1) Separation of management and supervisory functions
- (2) Independence of Board of Directors
- (3) Transparency of decision-making process
- (4) Speedy and flexible business execution

Role of The Board of Directors

Board of Directors System

Our Board of Directors, led by independent outside directors, decides the basic direction of management by taking a variety of perspectives into account and plays the role of supervising the executive directors. The number of directors on the board is sufficient to facilitate lively discussions and swift decision-making. In order to create an environment where discussions in board meetings are led by independent outside directors, these directors constitute a majority of the board, with one of them serving as board chair.

The Board of Directors decides on basic management policies and important matters set forth under the law, articles of incorporation and regulations of the Board of Directors itself. As of March 31, 2021, the Board of Directors consists of 12 directors, seven of whom are independent outside directors (of whom two are women). In order to carry out effective and flexible management, as a general rule, the Board of Directors delegates much of its power to decide on business activities to executive officers.

Status of Board of Directors Activities

The Board of Directors resolves important matters related to Group management based on laws and regulations of the Board of Directors itself, including drafting proposals for the General Meeting of Shareholders, selecting members for each committee and formulating business plans and product strategies. In addition to quarterly financial results, the Board regularly receives reports on the status of business execution, activities related to internal controls and the activities of each committee, while also discussing medium- to long-term management strategies. In the fiscal year under review, executive officers and directors held repeated discussions on the formulation of the NISSAN NEXT transformation plan, with directors offering recommendations from a supervisory perspective.

To enhance Board of Director discussions, regular meetings with outside directors that are chaired by the lead independent outside director are held to discuss a wide range of matters related to Nissan corporate governance and business. Opinions provided at these meetings are reflected in management and subsequent Board of Director discussions.

Further, to promote an understanding of our business and deepen our knowledge of governance, various training programs are held for directors throughout the year, such as executive business briefings, site inspections and governance lectures.

To facilitate discussions on the effectiveness of Board of Director activities, the board conducted an evaluation of its effectiveness in fiscal 2020, with the results of this evaluation reflected in activity plans for the upcoming fiscal year.

Audit Committee System and Authority

AUTHORITY / ROLE	RESOLUTION ITEMS
<ul style="list-style-type: none"> · To audit (monitor and supervise) executive officers' business execution and directors' performance of their duties. · To make executive officers and employees/ subsidiaries report on business execution and investigate the status of operation and financial conditions · To seek injunctions against illegal acts of directors, executive officers and employees · To produce annual audit reports · To select /dismiss external auditors · (Appointed Audit Committee member) to represent the company in any litigation brought against directors / executive officers 	<ul style="list-style-type: none"> · Annual audit reports to be submitted to shareholders meeting · Audit policy / rules and annual audit plan / budget of the Audit Committee · Proposal for shareholders meeting concerning the appointment / dismissal of external auditors · Assignment of staff employees of Audit Committee secretariat · Annual audit plan, budget and HC of Global Internal Audit Office, assignment and evaluation to the head of Global Internal Audit Office · Filing of litigation against directors / executive officers

As of March 31, 2021, the Audit Committee chaired by independent outside directors consists of five directors, four of whom are independent outside directors (of whom one is a woman). As part of audits on business execution including the organization and operation of Nissan's internal control systems, the Audit Committee receives reports from executive officers, corporate officers and employees on their business execution for Nissan and its group companies, in accordance with the Audit Committee's annual audit plan and on an ad-hoc basis as necessary. In addition, the Chair has meetings with executive officers including the President and Chief Executive Officer periodically and exchanges opinions in various areas.

Further, the Chair attends important meetings etc. to state his opinions, reviews internal approval documents and other important documents, and, when necessary, requests explanations or reports from executive officers and employees. The Chair shares his collected information with other members of the Audit Committee in a timely manner.

The Audit Committee, in conducting its audits, cooperates with the internal audit department and the independent auditors in an appropriate manner, making efforts to enhance the effectiveness of "tri-parties" audit. Under the leadership of the Audit Committee, collaboration among three parties is contributing to the enhancement of the effectiveness of internal control systems by sharing information on the issues pointed out by their respective audits and the status of their remediation in a timely manner. Further, the Audit Committee supervises the internal audit department, periodically receives reports from them on the progress and results of their internal audit activities conducted in accordance with their internal audit plan and, as necessary, gives them instructions regarding internal audit.

The Audit Committee is the contact point for whistleblowing with doubts regarding the involvement of management such as executive officers, and deals with whistleblowing by establishing a system where relevant executive officers cannot know the whistleblower and the content of whistleblowing.

Executive Officer System

Executive officers decide on business activities which are delegated in accordance with the resolutions of the Board of Directors and execute the business of the Nissan Group.

Several conference bodies have been established to deliberate on and discuss important corporate matters and the execution of daily business affairs. Furthermore, in the pursuit of more efficient and flexible management, the authority for business execution is clearly delegated as much as possible to corporate officers and employees.

As of March 31, 2021, eight executive officers, two of whom are representative executive officers, are appointed.

Basic Principles of the Internal Control System

We aim to provide superior value to all stakeholders, consider healthy governance the foundation for this, and are engaged in a range of activities to achieve it. In line with this principle, and in accordance with Japan's Companies Act and its related regulations, the Board of Directors has decided on internal control systems to pursue these goals and its own basic policy. The board continually monitors the status of implementation regarding these systems and the policy, making adjustments and improvements if necessary. The internal control system that was established in 2007 is chaired by CEO under the monitoring and supervision of the Board of Directors. All executive officers, corporate officers and departments, as well as group companies, cooperate closely under the CEO to improve the internal control system.

* Please refer to the Nissan Corporate Governance Overview for details on the internal control system (P53)
https://www.nissan-global.com/EN/COMPANY/PROFILE/CORPORATEGOVERNANCE/pdf/Overview_EN.pdf

Audit System

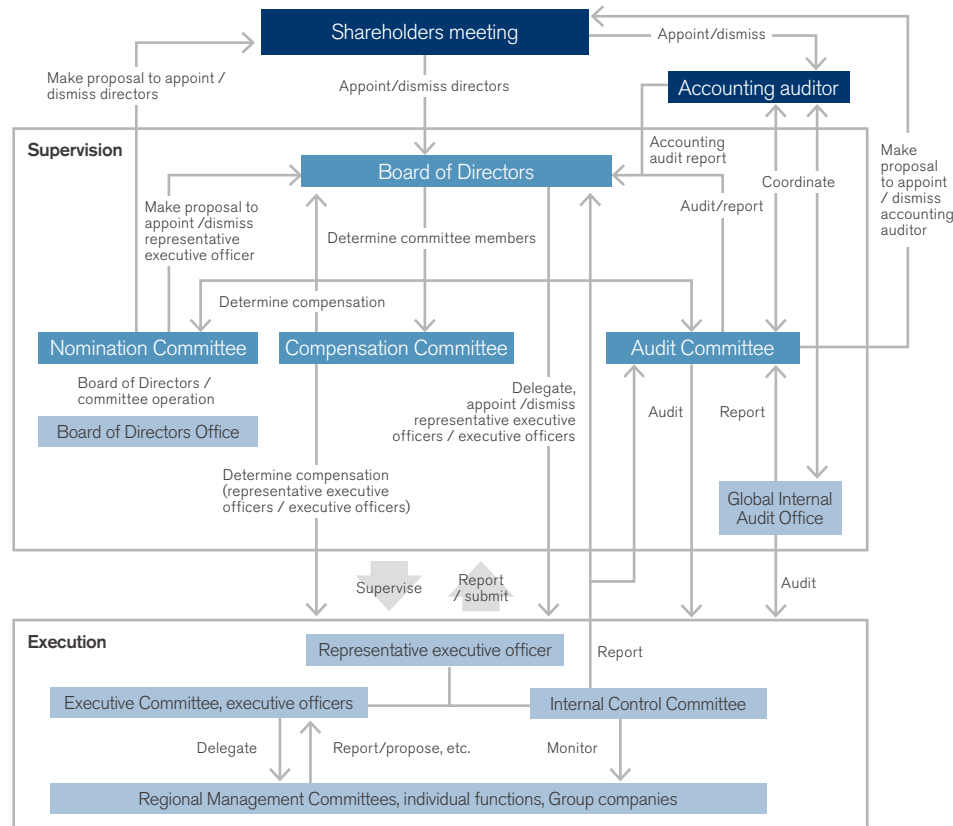

We have adopted a system under which the outside directors, Auditing Committee, department for internal audit and outside accounting auditors coordinate to improve the effectiveness of our internal control systems. Independent outside directors lead our Board of Directors, deciding the basic direction of management and supervising the execution of duties by directors, executive directors, and others with similar responsibilities. The Audit Committee takes charge of the department for internal audit and instructs it with regard to auditing, and the department for internal audit shall report to the Audit Committee the status of the performance of duties and any findings therefrom on an ongoing basis. The Audit Committee also receives similar reports from the accounting auditors, as well as detailed explanations on the status of the quality control of internal audits, to confirm whether their oversight is at a suitable level.

Independent Internal Audits

An independent, global internal audit function department has been established under the control of the Audit Committee. In each region, internal audit departments located at supervisory companies handle auditing tasks, while global specialized teams conduct audits across each region in the areas of sales finance, IT and *monozukuri*. Under the control of the Chief Internal Audit Officer, all internal audits are carried out efficiently and uniformly across the globe.

Avoidance of Conflict of Interest

In case of any transaction that involves any conflict of interest between the company and a director or executive officer, the Board Regulations provide that board approval, as well as a post-facto report to the board of important facts associated with the transaction, are required. Given the possibility of conflict of interest, the representative executive officer of the company must not concurrently serve as a director, executive officer, or any other officer or employee of a major shareholder; Mitsubishi Motors Corporation, which is one of the other parties of the Alliance; or any subsidiaries or affiliates of the above. If an executive officer serves in such position at the time of assuming the office of representative executive officer of Nissan, that officer and Nissan shall promptly take the necessary measures for the officer to leave the other company.

Regarding the designation of Audit Committee members, the company's Corporate Governance Guidelines provide that, given the potential conflict of interest with minority shareholders, it is not desirable that the Audit Committee should include any person who has experience serving as a director, executive officer or other officer or employee at a major Nissan shareholder or a subsidiaries or affiliate of same (except for a person seconded from Nissan).

In addition, in 2019, the company established a Director Conflict of Interest Resolution Policy which defines conflicts of interest between a director and the company, conducts annual conflict of interest questionnaires, requires directors to report any actual, potential or perceived conflicts and also establishes procedures to resolve such conflicts.
